1. INTRODUCTION

1.1 ORIGINAL PLAN AND REVISIONS

In 2013, the Town of Ingersoll hired UEM to assist them in developing an Asset Management Plan and Study. The final report was received in March of 2014 and adopted by Council, giving Ingersoll its first Asset Management Plan (AMP). Since the adoption of the initial plan, revisions to the plan were completed and approved in December 2014 and again in October 2016.

1.2 NEW UPDATED PLAN FOR 2022

Since the last revision to The Town of Ingersoll's Asset Management Plan (AMP), there has been considerable development in Asset Management practices and concepts in Ontario including new legislation from the Province, which includes new requirements and standards that must be adopted by all municipalities through a series of deadlines. With these changes in mind, staff have developed a completely new updated Asset Management Plan for the Town of Ingersoll.

This new updated Asset Management Plan (2022) was created based on concepts contained within the original plan, which have been updated and further improved upon. New metrics and measures have been added in order to comply with the new provincial regulations. These changes have expanded on and enhanced the original plan. With this new information The Town of Ingersoll is now in a position to make improved decisions with regards to investments in its infrastructure, now and into the future.

1.3 TOWN OF INGERSOLL OVERVIEW

Located in Oxford County in the heartland of Ontario's southwest, Ingersoll is a warm and vibrant community with over 12,000 residents. Founded by the Ingersoll family in 1793, the town has grown from a small farming community to a recognized leading industrial centre. Today, Ingersoll is a centre for manufacturing and is home to several industrial leaders. In addition to its thriving industrial sector, Ingersoll is also home to over 250 other businesses that employ more than 8,000 people.

The Town of Ingersoll currently owns and maintains a large variety of assets, which are provided for the use and benefit of the tax-paying public and visitors to the area. These include over 620,00 square metres of Road Surface, over 121,000 square metres of Sidewalks, 7 Bridges, 25 Culverts, almost 71,000 metres of Storm Sewer Infrastructure, 34 Facilities, 30 Vehicles, 101 pieces of Machinery & Equipment, and 128 different types of Land Improvements. The current cost to replace all this infrastructure totals almost \$253 Million Dollars.

The following chart represents the total Replacement Cost of all infrastructure currently owned and maintained by the Town of Ingersoll by asset categories:

TOTAL REPLACEMENT COSTS

1.4 PROVINCIAL REGULATIONS FOR ASSET MANAGEMENT

Asset Management for municipalities within the Province of Ontario is currently being regulated under Ontario Regulation 588/17, Asset Management Planning for Municipal Infrastructure, contained within the Infrastructure for Jobs and Prosperity Act, 2015.

This regulation details out a variety of requirements that each municipality must adhere to, along with compulsory information and metrics that must be included within their Asset Management Plans. Various elements must be developed, measured and included within their approved plan by a series of deadlines that commenced on July 1, 2019 and conclude on July 1, 2025.

Deadlines in the regulation include:

July 1, 2019: Adoption of an Asset Management Policy which includes all elements detailed with the Regulation (The Town of Ingersoll's policy came into effect on June 1, 2019);

July 1, 2022: Prepare an Asset Management Plan for its core municipal infrastructure which includes all the required elements detailed within the Regulation, including *Current Levels of Service* being provided within each asset class;

July 1, 2024: Update the Asset Management Plan to include all other municipal infrastructure (beyond its core municipal infrastructure) which includes all the required elements detailed within the Regulation, including Current Levels of Service being provided within each asset class;

July 1, 2025: Update the Asset Management Plan to include *Proposed Levels of Service* and the associated costs over the 10 years subsequent to the adoption of the plan.

The new Asset Management Plan (2022), contained within this document, will put the Town of Ingersoll in compliance with all legislative requirements contained within Ontario Regulation 588/17, with one exception. The regulation requires that Council consider possible changes to its Current Levels of Service for each asset class and include information in its plan related to Proposed Levels of Service for the future; this analysis and consideration of possible changes can obviously only occur after Council has adopted the current Asset Management Plan (2022), along with the Current Levels of Service contained within it. The deadline for this further analysis and any possible changes is July 1, 2025.

1.5 THE NEED FOR ASSET MANAGEMENT IN MUNICIPALITIES

Municipalities have always engaged in some form of asset management, through such tools as capital budgets, multi-year forecasts, road needs studies, parks master plans, and long-term financial planning. Informal and undocumented plans have been utilized in various manners and forms by municipal departments for decades.

But today's public sector environment requires that municipalities take a more formal, allencompassing approach and create a comprehensive program that deals with all of their municipal infrastructure together in one plan and ensure that all of their assets remain viable and usable for staff and the general public over the long term.

It is commonly known that municipalities do not currently have enough capital budget dollars available to fully-fund their asset replacement and renewal plans. Municipalities are being forced to find ways to keep and maintain assets beyond their normal lifespan due to these financial constraints. Capital budget dollars need to be properly prioritized so that critical infrastructure can be renewed before it deteriorates and fails. In order to accomplish this, municipalities require a detailed accounting of all their assets, which includes an assessment of their current condition, estimated costs to replace, on-going costs to maintain, estimated dates for replacement, and an evaluation of the risk/consequence of failure. Only when a municipality has accumulated all this information, can it create a long-term plan to properly manage all its assets.

A comprehensive asset management plan should also take into consideration other factors which can influence how to properly prioritize and make the appropriate decisions when investing in its infrastructure. These factors include, but may not be limited to, climate change, growth, and changing demographics of its residents, businesses, developers and visitors. While these elements may not always be easy to quantify they can greatly affect how well a municipality is positioned to adapt in today's changing environment.

1.6 OBJECTIVES

The Town's organization consists of Engineering, Public Works, Buildings, Clerks, Parks and Recreation, Treasury/Finance, Information Technology, Planning & Development Services, Fire and Emergency Services, and Economic Development.

The Asset Management Strategy and Plan was developed in consultation with all departments at the Town and with the following objectives:

- Creation of an Asset Management Plan conforming to provincial guidelines;
- Document a vision for asset management and define the actions and resources that will enable improved asset management by the Town;
- Understand the long term cost to sustain the assets owned by the Town to deliver the current and forecasted future needs to replace and maintain these assets;
- Facilitate involvement with staff and Council.

These objectives were achieved, taking into consideration the Town's size and available resources, and was coordinated with other relevant corporate initiatives.

1.7 SUSTAINABILITY OF THE PLAN

The objective of asset management is to meet a required level of service, in the most costeffective manner, through the management of assets for present and future use by staff and the tax-paying public. This can be achieved through the continued monitoring and management of the Town's infrastructure included with this Asset Management Plan, along with proper longterm capital planning and financing to support these assets.

Appendix C: "10 Year Capital Requirements Summarized by Program" shows how the Town is planning to invest in and finance this program over the next decade.

Section 5 Financial Strategy demonstrates how the Town intends to reach a point where infrastructure renewal is fully-financed and sustainable over the long-term.

2. PROJECT METHODOLOGY

2.1 PROJECT PURPOSE

The purpose of this project is to update the Town of Ingersoll's current Asset Management Plan (last adopted in October 2016) and bring it in line with current asset management concepts and practices and ensure that it satisfies all requirements within current legislation within the Province of Ontario.

2.2 ASSETS INCLUDED IN THE PLAN

The Town of Ingersoll operates and maintains a variety of assets which support the delivery of services for the tax-paying public and visitors to the Town. In order to manage these assets properly, it is beneficial to place them asset groupings or classifications so that similar assets can be operated and maintained in a uniform and consistent manner.

While the preliminary Asset Management Plan had a well-defined list of Asset Groupings that satisfied the Town's needs to put an initial plan in place, experience with this model has lead staff to re-define this listing to allow for better management of the assets and the respective data, as follows:

- Bridges and Culverts
- Roads Network
- Storm Sewer Services
- Facilities
- Land Improvements
- Machinery & Equipment
- Vehicles

Section 4.1 Asset Hierarchy will further define these Asset Categories and indicate what assets are included within each Categories.

Only assets whose replacement costs are expected to be included within the capital budget for the Town of Ingersoll are included within the project scope.

2.3 DATA AND INFORMATION

The following information was used in the completion of this project:

- Town of Ingersoll Organizational Structure, Roles and Responsibilities
- Asset Inventory and Associated Data held City-Wide Solutions Software
- Bi-annual Pavement Condition Assessment
- Bi-annual Bridge and Culvert Inspection Reports
- Town of Ingersoll's Tender Comparison Library for up to date prices for Transportation and Environmental Services Infrastructure

- Facility Assessments as completed
- Current Capital Programs
- Applicable Policies and Procedures.
- Knowledge of Assets as provided by Department Heads

2.4 PROJECT METHODOLOGY

Initial Plan:

Workshops were held to expand on the benefits and potential components within an asset management strategy. The objective was to define an initial high-level asset management strategy and a more detailed vision for asset management and asset reporting in Ingersoll. The workshops aimed at educating key staff on the best practices in asset management and to develop a common understanding of what the Town is aiming to achieve.

Once the Asset Management Framework and Strategy were developed, UEM staff executed the strategy using an Optimized Decision Model (ODM) and Ingersoll's asset data, developing initial outputs. The initial outputs identified shortfalls in the asset condition data, which UEM and Ingersoll staff worked together to address in further workshops. In 2014 further refinements were made to the plan to correct shortfalls in asset condition data.

New Updated Plan:

The methodology for the new updated plan was to build upon the solid foundation developed within the initial plan and expand on these ideas to include some new elements based on new developments in asset management strategies and bring the plan in line with current legislation and requirements.

A solid database of asset information has been maintained at the Town of Ingersoll for the past decade. The new AMP was developed based on this strong base of information. New data elements were added to the database to allow for new reporting requirements and further enhance analysis of risk models.

Risk Models in the initial plan were well conceived and were completed utilizing solid research and significant staff hours through a series of workshops to properly define the consequences of asset failure in various categories. These models are at the core of the new AMP with new elements being added to further improve risk modeling. Sections 3.2 Risk – Probability of Failure (POF) and Section 3.3 Risk – Consequence of Failure (COF) will further define how the new risk modeling is structured.

3. ASSET MANAGEMENT STRATEGY

3.1 CONDITION AND RISK

In order to properly manage asset replacement and renewal, staff require accurate information with regards to an asset's current *Condition* and the *Risk* associated with the possible failure of that asset. Every asset class will have its own unique manner of calculating these two measures; both ratings should play a part in determining the timing of an asset replacement/renewal.

CONDITION:

To assist a municipality in properly prioritizing asset replacements, each asset should be assessed based on its current condition. While some asset classes will have its conditional assessments closely relate to the age of its assets, other classes may vary widely due to other factors such as usage, traffic counts, operating hours, weather exposure, etc.

Some assets can have their condition assessed in-house, as there will be staff who have the expertise to evaluate the assets under their care. Other assets may require the use of 3rd party experts/consultants to properly review and evaluate their current condition. While other types of assets will lend themselves to a simple age as compared to useful life calculation, as there is limited benefit to spending time and money doing conditional assessments.

Examples:

Roadways: The Town of Ingersoll employs staff who through education, training and experience can properly assess the current condition of the Town's inventory of roadways. This is completed on bi-annual basis as part of their regular duties.

Bridges/Culverts: Assessing bridges and culverts is a very specialized field and as such all municipalities are required to have their bridge and culvert inventory assessed by a professional 3rd party firm on a bi-annual basis.

Vehicles: The replacement cost of most vehicles doesn't warrant the time and costs associated with completing regular conditional assessments; generally, the condition of vehicles is closely related to its age. As such, vehicles are conditionally-rated using an age to useful life comparison. The condition rating will be calculated as:

Useful Life Remaining / Total Useful Life x 100

The scale being utilized for Conditional Assessments throughout the AMP is shown below:

< 20	Very Poor
20 – 39	Poor
40 – 59	Fair
60 – 79	Good
80 - 100	Excellent

RISK:

Calculating the Risk related to the possible failure of an asset can be a complicated calculation, as a number of factors need to be considered to properly determine this measure. Condition, age, lifespan can all factor into the likelihood or *Probability of Failure (POF)* of an asset; while the impact to the Town in various categories such as Health & Safety, Finance, Environment, Legal & Regulatory Compliance, Reputation & Image, and Service Interruption will all factor into the effect or *Consequence of Failure (COF)* of an asset. Factors such as Total Replacement Costs and Usage Measures (such as traffic counts and user numbers) should also be factored into the *Consequence of Failure (COF)*.

The end product of **POF** x **COF** will result in an asset's final **Risk Factor**.

The scale being utilized for Risk Assessments throughout the AMP is shown below:

< 5	Very Low
5 – 7.99	Low
8 – 9.99	Fair
10 – 14.99	High
> 15	Very High

As the methodology behind calculating and measuring Risk is consistent throughout all assets classes in the Town's database, this measure can easily be compared across all asset classes which allows for prioritizing of asset renewal across various departments and asset categories.

3.2 RISK – PROBABILITY OF FAILURE (POF)

The Probability of Failure of an asset is basically defined as the likelihood that the asset will fail to function properly (or to the level required) in the near future. The best indicator of possible failure is the asset's current condition. This is why it is important that conditional assessments on the Town's assets be completed on a regular basis, especially for higher-value assets and assets critical to the operation of the Town. Other indicators that should be factored into the Probability of Failure are the current age and the expected lifespan of an asset.

Assets with lower replacement costs are often conditionally-rated by a simple Age compared to Expected Lifespan calculation, as the cost-benefit of completing condition assessments on these assets is not worth the time/money it will cost to complete them.

3.3 RISK – CONSEQUENCE OF FAILURE (COF)

The Consequence of Failure is a much more complicated and subjective measure to complete, as different perspectives and viewpoints regarding an assets worth or value to the Town can skew the results. In order to counteract these biases, The Town of Ingersoll, in completing its initial Asset Management Plan, did extensive work calculating these measures by holding workshops

involving a broad range of employees across all departments along with a group of qualified consultants to determine the final factors. The Consequences of Failure were rated in 6 different categories: *Health & Safety, Financial, Environmental, Legal & Regulatory Compliance, Reputation & Image* and *Service Interruption*. The scoring within all these categories was weighted based on the relative importance of each category. The final Consequence of Failure ratings that were determined are shown in Appendix F.

In the New Updated Plan for 2022, staff have taken the COF ratings from the original plan and factored in Replacement Costs and Usage Measures (such as Traffic Counts or Facility User Counts) to further supplement the Consequence of Failure calculations.

3.4 RISK MITIGATION STRATEGIES

Risk will always be present within any Asset Management Plan. The goal is to reduce or minimize these risks whenever/wherever they are present. While the best mitigation strategy will always be to replace or renew the asset that is posing the risk, this isn't always possible or affordable in the short-term.

The following are the risk mitigation strategies that will be considered and utilized to reduce or eliminate asset risk:

REMOVAL OF ASSET

Eliminates risk by 100%. The asset is no longer included in the asset inventory.

REBUILD/REPLACEMENT OF ASSET

If an asset is new or replaced, it decreases the asset risk to the asset class's minimum risk level. Risk level is changed to 'Low Risk' or 'Moderate Risk' according to the asset's COF. If the asset is rebuilt, it eliminates or lowers the asset risk based on the Estimated Remaining Life of the replacement asset.

INCREASED MAINTENANCE

Mitigates asset risk and lowers the risk priority by at least one level, i.e. a 'Very High Risk' priority level should at least change to 'High Risk' priority level with scheduled maintenance.

INCREASED INSPECTIONS

Asset risk level remains unchanged but increased monitoring will allow for a quicker response should the asset begin to fail.

3.5 ON-GOING DEVELOPMENT AND MAINTENANCE OF THE PLAN

Asset Management requires ongoing updates to the data and regular reviews of the processes and assumptions used in the development of the Asset Management Plan.

Asset Management staff will maintain and update the database on a regular basis to ensure all data is current, accurate and useful. The following processes will be completed on an annual basis (at a minimum):

- Enter all new capital purchases and additions during the year to the Asset Database;
- Remove from the Asset Database any assets that were sold or disposed of during the year;
- Record any donated or transferred assets that were assumed or received through new developments or boundary adjustments;
- Update the Asset Database for any new or updated Condition Assessments that have been completed during the year;
- Update the Asset Database for any new or updated Usage Measures that were recorded during the year;
- Review the Asset Database for any duplicate assets, anomalies or missing information;
- Reconcile the annual additions, transfers and disposals to the Town's general ledger;
- Review all Asset Profiles, Risk Models, and Condition Models to ensure they are calculating properly and are valid within the parameters and guidelines outlined in this Asset Management Plan.

All Senior Staff and Department Heads should, at a minimum, review the Asset Management Plan, and the underlying data for their respective department, each time a new Plan is presented to Council for approval, to ensure they are in agreement with assumptions, parameters, and data that is included within the document.

4. ASSET MANAGEMENT PLAN

4.1 ASSET HIERARCHY

The asset inventory has been organized to allow for easy search capabilities and to allow for asset profiles and risk modelling to be applied across similar groups of assets. Assets have been divided into 7 different asset categories and further sub-divided into various segments within these classes. Each asset is also assigned to a department which controls and maintains it, so that reporting can also be completed at a departmental level. See below for the established Asset Hierarchy for the Town of Ingersoll:

Asset Category	Asset Segment	Department
Bridges & Culverts	Bridges	Engineering
Bridges & Culverts	Culverts	Engineering
Road Network	Road Surfaces	Engineering
Road Network	Granular Road Bases	Engineering
Road Network	Sidewalks	Engineering
Road Network	Retaining Walls	Public Works
Road Network	Guardrails	Public Works
Road Network	Traffic Signals	Engineering
Road Network	Streetlights	Engineering
Storm Sewer Services	Gravity Mains	Engineering
Storm Sewer Services	Catch Basins	Engineering
Storm Sewer Services	Pumping Stations	Engineering
Storm Sewer Services	Storm Water Management Facilities	Engineering
Storm Sewer Services	Other Storm Sewer Components	Engineering
Facilities		Various
Land Improvements		Various
Machinery & Equipment		Various
Vehicles		Various

4.2 CURRENT ASSET INVENTORY

The Town of Ingersoll currently owns and maintains the following assets:

Asset Category	Assets in Category
Bridges & Culverts	• 7 Bridges
	 25 Culverts (over 3 metre span)
Road Network	 622,472 square metres of Road Surface
	 624,564 square metres of Granular Road Base
	 121,279 square metres of Sidewalks
	 3,003 metres of Retaining Wall
	 51 sections of Guardrail
	 7 Traffic Signals (6 with audible indicators)
	 2,215 Streetlights (some with arms and/or poles)

Storm Sewer Services 70,507 metres of Gravity Mains

1,770 Catch Basins • 1 Pumping Station

• 6 Storm Water Management Facilities • 930 Other Storm Sewer Components

Facilities • 34 Different Facilities

Land Improvements • 128 Different Land Improvements Machinery & Equipment

• 101 Pieces of Machinery & Equipment

30 Different Vehicles in the Fleet

This totals almost \$253 million dollars of infrastructure that needs to be operated, maintained, and eventually refurbished, renovated or replaced.

4.3 STATE OF INFRASTRUCTURE

Vehicles

The current state of the various assets within the Town's inventory are evaluated on three main components:

- 1. The current **Condition** of the asset;
- 2. The current Risk of the asset failing or not being capable of providing the expected level of service;
- 3. The Funding available to maintain, renovate and/or replace that asset when its expected life is over.

Below is a summary of the current state of the infrastructure by assets categories:

Table 4.1. Current State of Infrastructure

ASSET CLASS	AVERAGE CONDITION OF ASSETS	AVERAGE RISK RATING OF ASSETS	CURRENT UNDER- FUNDING OF REPLACEMENT
BRIDGES & CULVERTS	72.65	7.20	\$179,369
ROAD NETWORK	80.54	3.82	\$1,088,043
STORM SEWER SERVICES	88.24	2.18	\$229,172
FACILITIES	64.63	4.93	\$818,500
LAND IMPROVEMENTS	65.95	6.44	\$321,545
MACHINERY & EQUIPMENT	47.78	5.37	\$58,425
VEHICLES	58.55	7.05	\$76,500

Overall, based on Condition and Risk ratings, the Town's infrastructure is in decent condition and pose no major worries or risks to the Town. Those individual assets that do indicate some concern due to deteriorating condition and/or increasing risk (which are few in number) are on staff's radar and are planned for replacement or re-investment within reasonable timeframes.

Current under-funding of the asset renewal program does cause some concern, but a reasonable plan for overcoming this shortfall is detailed within this plan. Increases in the annual capital funding over the long-term and proper utilization of the information contained within this plan, including the risk analysis for each asset, will ensure that critical infrastructure is renewed responsibly and all assets remain viable.

4.4 LEVELS OF SERVICE

The Province of Ontario, through Ontario Regulation 588/17, requires all municipalities to set Levels of Service for each asset class within its Asset Management Plan.

As this is the first Asset Management Plan for the Town of Ingersoll that includes Levels of Service, the measures included in the Plan indicate the current Levels of Service being provided to the public and/or the target measures based on the current assets owned and the current staff levels being maintained.

Future versions of the AMP will need to explore whether these current Levels of Service are adequate for the public on an on-going basis or whether the Town wishes to set different Proposed Levels of Service for the future and plan for the increased (or decreased) costs associated with these new standards.

Individual Levels of Service for each Asset Class are shown in Appendix B Detailed State of the Infrastructure by Asset Category, and will include the following types of measures:

CONDITION: Set acceptable ranges for Condition Ratings that should be maintained for the overall asset category.

RISK: Sets Risk Level tolerances which indicate when individual assets need to be considered for renovation/renewal.

MAINTENANCE: Indicates Maintenance Activities or Standards that should be completed and adhered to.

4.5 GROWTH AND CLIMATE CHANGE

The Town of Ingersoll will see slow modest growth over the next 25 years at an average rate of about 1.5% per year, in both general population and across the commercial/industrial sector (based on information contained within the County of Oxford's most recent growth forecasts). Growth at this level is easily managed and it should not put any undue strain on the current

infrastructure that the Town currently owns and operates. The slight increase in vehicular traffic utilizing the transportation network and the small rise in user numbers for town-owned facilities and other public assets should be easily absorbed within the current operating structure.

While extreme weather events have increased slightly in both frequency and intensity over the last decade due to climate change, there has been no indication that the Town's infrastructure is under-sized or inadequate to handle the impacts from these events. Design standards for the storm sewer system and the road network are reviewed on a regular basis to ensure that they are up-to-date and adequate to handle expected weather conditions. Costing for replacement costs of infrastructure are up-dated to reflect any increases that occur in these design standards.

Individual impacts to each asset class related to Growth and Climate Change are detailed in Appendix "B".

5. FINANCIAL STRATEGY

5.1 FINANCIAL STRATEGY OVERVIEW

This financial strategy sets out a plan that outlines how the Town can fund the lifecycle activities required to maintain its assets at the desired levels of service. The strategy presented is a suggested approach, which should be re-evaluated during the annual budgeting processes to ensure the sustainability of the Town's financial position as it relates to its assets.

The financial strategy uses year-end 2021 as the analysis reference to achieve the determined level of service for each asset category. The financial strategy has been developed to address the short and mid-term investment needs based on the 10-year Capital Plan of the Town, as well as the average annual capital investment requirement over the next 100 + years.

The Town finances its Capital Program through various sources:

- Ontario Community Infrastructure Fund (OCIF) formula based funding that is a stable and long-term funding source for capital projects.
- Federal Gas Tax funding is also a stable and long-term source of funding.
- Reserves and Reserve Funds the Town maintains several reserves that have been established to finance capital expenditures. The Town makes transfers to these capital reserves during the annual budget process.
- Development Charges Reserve Funds that are used to finance all growth related capital projects.
- Debt financing as required in years where significant capital needs are identified.

These financing options were considered during the process of developing the financing strategy and are described in more detail in Sections 5.2 through 5.6 below.

5.2 ANNUAL FUNDING REQUIREMENTS & CURRENT INFRASTRUCTURE GAP

The annual funding requirement represents the amount the Town should allocate annually to each asset category to fully finance replacement needs as they arise and achieve long-term sustainability.

The annual funding requirement is calculated based on the total replacement costs for each asset category and the expected life of the assets contained within it. The annual requirement is an estimate of the average future funding needs, it does not mean the Town will spend this amount each year. In some years, we might spend more and in other years it will be less. The periods of low capital needs would allow for the build up of the capital reserves that could be used in times of high capital needs.

Table 5.1 presents the Town's current annual contributions towards capital-related needs – as detailed in the Town's 2022 Operating Budget – as well as the annual funding requirement,

referenced as the funding target. The difference between the annual funding target and current annual contribution is referred as the "Infrastructure Gap".

The annual funding target has been estimated to total \$7.04 million. In comparison, the Town budgeted to contribute approximately \$4.28 million towards capital-related needs in 2022. Included in this amount are budgeted contributions to capital reserves (\$3.04 million), development charges (\$193 thousand), OCIF Grant (\$627 thousand), and Federal Gas Tax (\$412 thousand). The sum of these components is the sustainable capital funding that the Town contributed in 2022 to the provision of capital-related needs.

Based on these calculations the Town is currently underfunding its asset renewal / replacement program by approximately \$2.77 million annually. The amount of under-funding is significant, but this is a very common situation that the majority of municipalities across the Province are experiencing.

Table 5.1 Current Infrastructure Gap

	ANNUAL FUNDING TARGET	CURRENT ANNUAL CONTRIBUTION	INFRASTRUCTURE GAP		
BRIDGES & CULVERTS	\$443,069	\$263,699	\$179,370		
ROAD NETWORK	\$3,467,750	\$2,379,708	\$1,088,042		
STORM SEWER SERVICES	\$563,765	\$334,593	\$229,172		
FACILITIES	\$1,508,500	\$690,000	\$818,500		
LAND IMPROVEMENTS	\$350,545	\$29,000	\$321,545		
MACHINERY & EQUIP	\$356,425	\$298,000	\$58,425		
VEHICLES	<u>\$356,500</u>	\$280,000	<u>\$76,500</u>		
TOTAL	\$7,046,554	\$4,275,000	\$2,771,554		

5.3 LONG-TERM FINANCIAL STRATEGY

As we move into a longer period, the financing requirements increase so it continues in the best interest of the Town to allocate as much funding as possible towards the overall capital program. While the annual funding requirement may fluctuate, it is important for the Town to implement a consistent, yet increasing, annual investment in capital so that the excess annual funds can accrue in capital reserves, until the Infrastructure Gap has been overcome.

Without consideration of any other sources of revenue, in order to reach the annual funding target of \$7.04 million over 10 years, increases in the Town's taxation levy of approximately 1.5% would be required. To minimize the impact on taxpayers, the Town may choose to increase the levy by 1% and lengthen the transition period to 15 years as illustrated in Table 5.2 below.

Table 5. 2 Financing Strategy for Fully –Funded Annual Requirement

ANNUAL AMP FUNDING TARGET: \$7,046,554

CURRENT AMP FUNDING AVAILABLE: \$4,275,000

INFRASTRUCTURE GAP: \$2,771,554

YEAR	1% TAX LEVY 15-YEAR O			EVY INCREASE AR OPTION

2025	\$167,892	\$4,773,705	\$254,338	\$5,026,792
2026	\$169,571	\$4,943,276	\$258,153	\$5,284,945
2027	\$171,267	\$5,114,543	\$262,025	\$5,546,970
2028	\$172,979	\$5,287,522	\$265,955	\$5,812,925
2029	\$174,709	\$5,462,231	\$269,945	\$6,082,869
2030	\$176,456	\$5,638,687	\$273,994	\$6,356,863
2031	\$178,221	\$5,816,908	\$278,104	\$6,634,967
2032	\$180,003	\$5,996,911	\$282,275	\$6,917,242
2033	\$181,803	\$6,178,714	\$129,312	\$7,046,554
2034	\$183,621	\$6,362,335		
2035	\$185,457	\$6,547,792		
2036	\$187,312	\$6,735,104		
2037	\$189,185	\$6,924,288		
2038	\$122,266	\$7,046,554	l	

It is recommended to proceed with the 10-year option. Considering annual assessment growth of approximately 1.5%, the impacts on individual property tax bills from this financial strategy would be nominal.

In the interval, the Town of Ingersoll will need to utilize existing reserves and push the lifespan of some existing assets beyond their expected useful lives in order to keep the AMP viable and keep the infrastructure usable for both staff and the public. Alternative financing tools will also be explored as required. Those include, debt issuance, partnerships, new periodic senior government infrastructure funding and allocating of operating surpluses to the capital program the following year or to capital reserves. If other sources of revenue become available, the impact on the Town's taxation levy would potentially decrease.

5.4 10-YEAR CAPITAL REQUIREMENTS AND FORECAST

O.Reg. 588/17 requires a 10-year capital plan that forecasts the costs of implementing the lifecycle management strategy and the lifecycle activities.

The 10 -year capital plan illustrates the short and mid-term investment needs of the Town rather than the average requirement over the next 100 + years.

New updated 10-Year capital plans are included with and adopted by Council within the yearly budget process. Table 5.3 below presents the summarized Capital Plan for 2022-2031 forecast period. The detailed 10 – year Capital Plan is shown in Appendix "C". The capital expenditures forecast presented in Table 5.3 also summarizes the recommended financing strategy to fund the capital projects identified herein. The financing forecast is based on the funding sources identified in the Town's 2022 budget combined with the recommended 1.5% tax levy increase proposed in Section 5.3. This financing strategy has been developed to be fully funded, and therefore no funding shortfalls have been identified. However, this means that if identified grants are not received at expected amounts then shortfalls may present themselves. Additionally, a new debenture issuance of \$8 million will be required to finance the construction of a new Multi-Use Recreational Centre (MURC).

There may also be a few assets that have been overlooked or haven't been included due to cost or other factors. It is anticipated, as senior staff get an opportunity to further review the information in this plan and play an active part in the further development of future Asset Management Plan updates, that the 10-Year Capital Plan and this Asset Management Plan will be fully integrated and those assets that indicate "Poor" Condition or "High" Risk will be included in and highlighted in the capital forecasts and budget discussions.

5.5 USE OF RESERVES

Capital reserves play a critical role in long-term financial planning. The Town has accumulated significant reserves over the years. These reserves are available for use to fund capital projects during the 10-year phase-in period to full funding. After the Town reaches its full capital funding status, the reserves will be used to offset peaks in capital expenditures, accumulate funding for significant infrastructure investments, or be used for emergency capital investments. The table 5.4 below outlines the capital reserves and reserve funds currently available to the Town.

Table 5.4 Capital Reserves and Reserve Funds

RESERVES	BALANCE AT DECEMBER 31, 2021
ROADS, BRIDGES & STORM SEWER	\$4,158,829
FACILITES	\$4,136,598
INFORMATION TECHNOLOGY	\$139,076
LAND IMPROVEMENTS	\$156,085
MACHINERY, VEHICLES & EQUIPMENT	\$2,444,191
CAPITAL CONTINGENCY	\$624,252
RESERVE FUNDS	\$1,158,243
TOTAL	<u>\$ 12,817,274</u>

5.6 USE OF DEBT

The financial strategy outlined in this document requires the Town to use long-term debt to fully fund its 10-year Capital Plan. A new debenture for \$8 million is proposed to finance the construction of a new Multi-Use Recreational Centre. The debenture will smooth the impact of this large value and high priority project over several years that would otherwise immediately draw down Town's capital reserves. The cost of servicing this debt will be recovered over time through property taxes and user fees.

The Town has not issued new debt since year 2015 that allowed the Corporation to maximize the debt repayment limit prescribed by the Province. Additionally, several debentures will be maturing over the next three years (2023, 2024 and 2025) rustling in decreases in Town's annual debt repayments. It is recommended to capture these savings and allocate them to servicing of the new debt for the MURC. The first two years from the issuance of the new debt will require additional funds to finance increased annual debt repayments; however, starting year three the savings from the repayment of the matured debentures will fully compensate the servicing costs of the new debt. The below table 5.5 outlines this concept.

Table 5.5 Tax Supported Debt Forecast

6. CONCLUSIONS

Overall, the Current State of the Infrastructure in the Town of Ingersoll is showing that assets are in relatively good condition, key assets are either in decent shape or are scheduled for renewal in the near future. Risk analysis indicates that the majority of assets represent minimal risk to the Town and those assets that are recognized as potential risks are being dealt with an appropriate manner.

While under-funding of the Asset Management Program does present some challenges, the recommended financing strategy will solve these issues and ensure that the Town's infrastructure remains usable and viable over the long-term.

Levels of Service established in this Plan represent the current levels of service being provided to the general public and are a representation of the balance between public demand and the level that Council is comfortable with and/or can afford to provide. Changing demographics, environment, and expectations may cause Council to consider changing some of these Levels of Service in the future. As part of the legislative deadlines for Asset Management in Ontario, the Town of Ingersoll will have to consider Future Levels of Service within its plan (and the costs over the next 10 years related to any change) in an update to this plan prior to July 1st, 2025.

7. RECOMMENDATIONS

The Town of Ingersoll with the adoption of the Town of Ingersoll Comprehensive Asset Management Plan 2022 will put in place a detailed plan to manage and maintain over \$250 million dollars of infrastructure that it currently owns. The information contained within it can be leveraged to make improved capital decisions and ensure that capital investments in the Town's infrastructure are made in the most appropriate manner.

The plan, and the data being maintained and tracked behind it, should continue to evolve and get better over time. As such regular updates to the AMP need to be completed, so that staff and department heads have up-to-date data to work with. Improved and up-dated condition assessments, risk profiles, asset attributes should continue to develop making the data more accurate and the resulting analysis enhanced.

With all this in mind, the following are recommendations are being made:

- 1. Updated Asset Management Plans should be presented to Council every 2 to 3 years; the Town's needs, replacement costs, and underlying data can change frequently and the plan will change and evolve as these occur.
- 2. At a staff level the AMP should be updated yearly, so that current data is available to staff and Department Heads in advance of the capital budget process.
- 3. Department Heads need to integrate the AMP with their Capital Budget Processes, so that budget recommendations consider and reflect the risk analysis contained within the Plan.
- 4. Department Heads need to take an active role in future updates to the AMP through review of the assets under their control and the under-lying assessments and analysis associated with them.
- 5. Annual funding increases for capital spending, as recommended in this Plan, be maintained over the long-term.

APPENDICES

APPENDIX A

NOTES TO ASSET REPORT CARD:

1. The Asset Report Card is only intended to give the reader a quick indication of the current state of the infrastructure. More detailed information can be found within Appendix "B", Detailed State of the Infrastructure by Asset Category, and Appendix "E", Asset Listings by Asset Category.

APPENDIX B - DETAILED STATE OF THE INFRASTRUCTURE BY ASSET CATEGORY

BRIDGES & CULVERTS – BRIDGES

INVENTORY:

The Town currently owns (7) Bridge Structures: (5) Vehicular Bridges and (2) Walking Bridges – These are further segmented into Bridges Structures and Bridge Decks within the asset inventory as these components have differing characteristics and lifespans. See Appendix D – for the detailed listing of all the assets in this Asset Category.

ESTIMATED ASSET LIFE:

Bridge Structures – **75 Years**Bridge Decks – **25 Years**

INTEGRATED ASSETS:

Roads; Sidewalks

AVERAGE AGE OF ASSETS IN THE CATEGORY:

Overall: 26.00 Years Old

Bridge Decks: 26.00 Years Old; Bridge Structures 26.00 Years Old

TOTAL \$'S TO REPLACE THE ENTIRE ASSET CATEGORY:

The total dollars to replace all assets within the Category is: \$13,045,961

CURRENT CONDITION OF ASSETS:

All Bridges in the inventory are conditionally assessed by a 3rd Party Contract on a Bi-Annual Basis. Individual condition assessments for each bridge can be found in Appendix D.

Overall average condition rating for the Bridges is **72.09** out of **100** which indicates that this category is in **"GOOD"** condition. Bridge Decks: **70.20**; Bridge Structures: **73.99**

Very Good	Good	Fair	Poor	Very Poor
2 Assets	11 Assets	0 Assets	1 Asset	0 Assets
\$2,650,000	\$9,968,802	\$0	\$427,159	\$0

RISK:

Overall Average Risk Rating for the Asset Category: **6.97** which indicates a **"GOOD"** risk rating. Bridge Decks: **6.70**; Bridge Structures: **7.23**

100000			0335300	and the second
1 - 4	5 - 7	8 - 9	10 - 14	15 - 25
2 Assets	9 Assets	2 Assets	1 Asset	0 Assets
\$2,650,000	\$2,406,957	\$7,561,845	\$427,159	\$0

\$'S PER YEAR REQUIRED FOR REPLACEMENT PROGRAM:

Annual requirement needed is \$225,741.

Current annual amount dedicated to Bridge Replacement is \$134,353.

MAINTENANCE ACTIVITIES:

The following procedures are undertaken on re-occurring basis as part of the Bridge Maintenance Program:

- Regular Safety Inspections
- Bi-Annual Inspections by a Qualified 3rd Party Consultant
- Cleaning
- Painting
- Minor Repairs

There is currently \$10,770 in the Annual Operating Budget to offset the costs of these maintenance activities, which should ensure that these activities continue to occur.

LEVELS OF SERVICE:

CONDITION:

Bridge Infrastructure should be maintained at an overall condition rating of 65 – 75.
 Current Overall Condition Rating is at 72.09.

RISK:

1. All Bridge Infrastructure will a Risk Rating of "10" or higher should be scheduled for capital work within the next 10 years.

1 of 1 Bridge Assets with a Risk rating of "10" or higher are included in the 10-Year Capital Program.

MAINTENANCE:

1. All Bridges should be maintained according to Minimum Maintenance Standards as per Ontario Regulation 239/02 for Patrols and Bridge Deck Spalls.

All Bridges are currently maintained to Ontario Minimum Maintenance Standards

2. All Bridges should be inspected by a qualified independent 3rd party consultant once every 2 years.

All Bridges are inspected once every 2 years.

METRICS:

SCOPE:

1. Total of **7** Bridges owned by the Town of Ingersoll; this represents **0.37** bridges per square km in the Town.

QUALITY:

- 1. Average Condition Index of **72.09** out of **100** for Bridge Infrastructure.
- 2. There are currently "0" Bridges with Load Restrictions.

GROWTH AND CLIMATE CHANGE:

GROWTH: The Town will experience slow but steady growth over the next 10 years which will result in small increases in traffic each year for both passenger and commercial vehicles. These minor increases will have insignificant impact to the long-term condition and quality of Bridge Infrastructure in the Town over this span.

CLIMATE CHANGE: While Climate Change is causing a slight increase in the number and intensity of significant weather events, the Town does not anticipate any major financial impacts to this Asset Category over the next 10 years.

APPENDIX B - DETAILED STATE OF THE INFRASTRUCTURE BY ASSET CATEGORY

BRIDGES & CULVERTS – CULVERTS

INVENTORY:

The Town currently owns and maintains 25 culverts that span over 3 metres. See Appendix D – for the detailed listing of all the assets in this Asset Category.

ESTIMATED ASSET LIFE:

Culverts - 75 Years

INTEGRATED ASSETS:

Roads; Sidewalks; Storm Sewer Services

AVERAGE AGE OF ASSETS IN THE CATEGORY:

Overall: 33.80 Years Old

TOTAL \$'S TO REPLACE THE ENTIRE ASSET CATEGORY:

The total dollars to replace all assets within the Category is: \$16,299,574

CURRENT CONDITION OF ASSETS:

All Culverts in the inventory are conditionally assessed by a 3rd Party Contract on a Bi-Annual Basis. Individual condition assessments for each bridge can be found in Appendix D.

Overall average condition rating for the Culverts is **73.21** out of **100** which indicates that this category is in **"GOOD"** condition.

Very Good	Good	Fair	Poor	Very Poor
5 Assets	16 Assets	3 Assets	1 Asset	0 Assets
\$2,972,667	\$10,996,566	\$1,174,329	\$1,156,012	\$0

RISK:

Overall Average Risk Rating for the Asset Category: 7.43 which indicates a "GOOD" risk rating.

\$'S PER YEAR REQUIRED FOR REPLACEMENT PROGRAM:

Annual requirement needed is \$217,328.

Current annual amount dedicated to Culvert Replacement is \$129,346.

MAINTENANCE ACTIVITIES:

The following procedures are undertaken on re-occurring basis as part of the Culvert Maintenance Program:

- Regular Safety Inspections
- Bi-Annual Inspections by a Qualified 3rd Party Consultant
- Cleaning

There is currently \$10,770 in the Annual Operating Budget to offset the costs of these maintenance activities, which should ensure that these activities continue to occur.

LEVELS OF SERVICE:

CONDITION:

Culvert Infrastructure should be maintained at an overall condition rating of 65 – 75.
 Current Overall Condition Rating is at 73.21.

RISK:

1. All Culvert Infrastructure will a Risk Rating of **"10"** or higher should be scheduled for capital work within the next 10 years.

1 of 1 Culvert Assets with a Risk rating of "10" or higher are included in the 10-Year Capital Program.

MAINTENANCE:

1. All Culverts should be maintained according to Minimum Maintenance Standards as per Ontario Regulation 239/02 for Patrols and Bridge Deck Spalls.

All Culverts are currently maintained to Ontario Minimum Maintenance Standards

2. All Culverts should be inspected by a qualified independent 3rd party consultant once every 2 years.

All Culverts are inspected once every 2 years.

METRICS:

SCOPE:

1. Total of **25** Culverts owned by the Town of Ingersoll; this represents **1.33** culverts per square km in the Town.

QUALITY:

- 1. Average Condition Index of **73.21** out of **100** for Culvert Infrastructure.
- 2. There are currently "0" Culverts with Load Restrictions.

GROWTH AND CLIMATE CHANGE:

GROWTH: The Town will experience slow but steady growth over the next 10 years which will result in small increases in traffic each year for both passenger and commercial vehicles. These minor increases will have insignificant impact to the long-term condition and quality of Culvert Infrastructure in the Town over this span.

CLIMATE CHANGE: While Climate Change is causing a slight increase in the number and intensity of significant weather events, the Town does not anticipate any major financial impacts to this Asset Category over the next 10 years.

APPENDIX B - DETAILED STATE OF THE INFRASTRUCTURE BY ASSET CATEGORY

ROAD NETWORK – ROAD SURFACES

INVENTORY:

The Town currently owns and maintains 622,472.5 m2 of Road Surface.

Arterial Road Surface: 129,595.48 m2; Collector Commercial Industrial Road Surface: 25,705.10 m2; Collector Residential Road Surface: 107,717.37 m2; Local Commercial Industrial Road Surface: 32,868.55 m2; Local Residential Road Surface: 326,586 m2

See Appendix D – for the detailed listing of all the assets in this Asset Category.

ESTIMATED ASSET LIFE:

Road Surfaces - 15 Years

INTEGRATED ASSETS:

Road Base; Sidewalks; Storm Sewer Services; Water & Wastewater Assets (County-owned)

AVERAGE AGE OF ASSETS IN THE CATEGORY:

Overall: 20.78 Years Old

TOTAL \$'S TO REPLACE THE ENTIRE ASSET CATEGORY:

The total dollars to replace all assets within the Category is: \$32,772,837

CURRENT CONDITION OF ASSETS:

All Road Surfaces in the inventory are conditionally assessed in-house by Engineering Services on Bi-Annual Basis. Individual condition assessments for each asset in this category can be found in Appendix D.

Overall average condition rating for the Road Surfaces is **83.79** out of **100** which indicates that this category is in "VERY GOOD" condition.

Very Good	Good	Fair	Poor	Very Poor
182 Assets	95 Assets	57 Assets	10 Assets	6 Assets
\$17,418,245	\$8,641,860	\$5,410,715	\$791,436	\$510,581

RISK:

Overall Average Risk Rating for the Asset Category: 3.36 which indicates a "VERY GOOD" risk rating.

1 - 4	5 - 7	8 - 9	10 - 14	15 - 25
303 Assets	43 Assets	4 Assets	0 Assets	0 Assets
\$27,194,365	\$4,902,939	\$675,533	\$0	\$0

\$'S PER YEAR REQUIRED FOR REPLACEMENT PROGRAM:

Annual requirement needed is *\$2,184,856*.

Current annual amount dedicated to Road Surfaces is \$1,503,945.

MAINTENANCE ACTIVITIES:

The following procedures are undertaken on re-occurring basis as part of the Road Maintenance Program:

- Winter Maintenance Snow Plowing/Clearing Sanding/Salting
- Sweeping
- Line Painting
- Asphalt Patching
- Curb and Gutter repairs
- Crack Sealing
- Tree Maintenance
- Weekly Inspections

There is currently \$613,580 in the Annual Operating Budget to offset the costs of these maintenance activities, which should ensure that these activities continue to occur.

LEVELS OF SERVICE:

CONDITION:

- Road Surfaces should be maintained at an overall condition rating of 75 85.
 Current Overall Condition Rating is at 83.79.
- 2. % of Roads in Good to Very Good Condition (as reported for MPMP) should be a minimum of 65%.

% of Roads in Good to Very Good Condition is: 79.14%

RISK:

1. All Road Surfaces will a Risk Rating of "10" or higher should be scheduled for capital work within the next 10 years.

0 of 1 Road Surfaces with a Risk rating of "10" or higher are included in the 10-Year Capital Program.

MAINTENANCE:

 Road Surfaces should be maintained according to Minimum Maintenance Standards as per Ontario Regulation 239/02 for Patrols, Winter Maintenance, Pot Holes, Cracks, Debris, Lighting and Signage.

100% of Road Surfaces are maintained to Ontario Minimum Maintenance Standards

METRICS:

SCOPE:

Total of *622,472.50 m2* of Road Surface is owned by the Town of Ingersoll; this represents *33,204 m2* of Road Surface per square km in the Town.

QUALITY:

Average Condition Index of **83.79** out of **100** for Road Surface Infrastructure which indicates that Road Surfaces are in "VERY GOOD" condition.

GROWTH AND CLIMATE CHANGE:

GROWTH: The Town will experience slow but steady growth over the next 10 years which will result in small increases in traffic each year for both passenger and commercial vehicles. These minor increases will have insignificant impact to the long-term condition and quality of Road Infrastructure in the Town over this span.

CLIMATE CHANGE: While Climate Change is causing a slight increase in the number and intensity of significant weather events, the Town does not anticipate any major financial impacts to this Asset Category over the next 10 years.

APPENDIX B - DETAILED STATE OF THE INFRASTRUCTURE BY ASSET CATEGORY

ROAD NETWORK - GRANULAR ROAD BASE

INVENTORY:

The Town currently owns and maintains 624,564.48 m2 of Granular Road Base.

Arterial Road Base: 130,013.98 m2; Collector Commercial Industrial Road Base: 23,975 m2; Collector Residential Road Surface: 109,691.15 m2; Local Commercial Industrial Road Surface: 34,849.65 m2; Local

Residential Road Surface: 326,034.7 m2

See Appendix D – for the detailed listing of all the assets in this Asset Category.

ESTIMATED ASSET LIFE:

Culverts - 50 Years

INTEGRATED ASSETS:

Road Surface; Sidewalks; Storm Sewer Services; Water & Wastewater Assets (County)

AVERAGE AGE OF ASSETS IN THE CATEGORY:

Overall: 27.71 Years Old

TOTAL \$'S TO REPLACE THE ENTIRE ASSET CATEGORY:

The total dollars to replace all assets within the Class is: \$40,271,782

CURRENT CONDITION OF ASSETS:

All Granular Road Bases in the inventory are conditionally assessed by an Age-Based Calculation. Individual condition assessments for each asset in this category can be found in Appendix D.

Overall average condition rating for the Road Bases is **78.73** out of **100** which indicates that this category is in **"GOOD"** condition.

Very Good	Good	Fair	Poor	Very Poor
196 Assets	64 Assets	17 Assets	17 Assets	45 Assets
\$23,299,716	\$8,193,088	\$2,854,663	\$2,480,410	\$3,443,906

RISK:

Overall Average Risk Rating for the Asset Category: 3.88 which indicates a "VERY GOOD" risk rating.

1 - 4	5 - 7	8 - 9	10 - 14	15 - 25
257 Assets	30 Assets	42 Assets	10 Assets	0 Assets
\$29,999,770	\$4,399,397	\$4,220,441	\$1,652,175	\$0

\$'S PER YEAR REQUIRED FOR REPLACEMENT PROGRAM:

Annual requirement needed is \$805,436

Current annual amount dedicated to Road Base Replacement is \$684,276.

MAINTENANCE ACTIVITIES:

The following procedures are undertaken on re-occurring basis as part of the Road Maintenance Program:

- Weekly Inspections
- Roadside Maintenance

There is currently \$127,580 in the Annual Operating Budget to offset the costs of these maintenance activities, which should ensure that these activities continue to occur.

LEVELS OF SERVICE:

CONDITION:

- Road Bases should be maintained at an overall condition rating of 70 80.
 Current Overall Condition Rating is at 78.73.
- 2. % of Roads Bases in Good to Very Good Condition (as reported for MPMP) should be a minimum of 65%.

% of Roads Bases in Good to Very Good Condition is: 76.7%

RISK:

1. All Road Bases will a Risk Rating of "12" or higher should be scheduled for capital work within the next 10 years.

1 of 2 Road Bases with a Risk rating of "12" or higher are included in the 10-Year Capital Program.

MAINTENANCE:

 Road Bases should be maintained according to Minimum Maintenance Standards as per Ontario Regulation 239/02 for Patrols, Winter Maintenance, and Pot Holes.

100% of Road Bases are maintained to Ontario Minimum Maintenance Standards

METRICS:

SCOPE:

Total of *624,564 m2* of Granular Road Base is owned by the Town of Ingersoll; this represents *33,315 m2* of Road Base per square km in the Town.

QUALITY:

Average Condition Index of **78.73** out of **100** for Granular Road Base Infrastructure which indicates that Road Base in **"GOOD"** condition.

GROWTH AND CLIMATE CHANGE:

GROWTH: The Town will experience slow but steady growth over the next 10 years which will result in small increases in traffic each year for both passenger and commercial vehicles. These minor increases will have insignificant impact to the long-term condition and quality of Road Infrastructure in the Town over this span.

APPENDIX B - DETAILED STATE OF THE INFRASTRUCTURE BY ASSET CATGEORY

ROAD NETWORK – SIDEWALKS

INVENTORY:

The Town currently owns and maintains 121,279 m2 of Sidewalks. See Appendix D – for the detailed listing of all the assets in this Asset Category.

ESTIMATED ASSET LIFE:

Sidewalks - 30 Years

INTEGRATED ASSETS:

Roads; Streetlights

AVERAGE AGE OF ASSETS IN THE CATGEORY:

Overall: 23.10 Years Old

TOTAL \$'S TO REPLACE THE ENTIRE ASSET CATGEORY:

The total dollars to replace all assets within the Category is: \$7,276,744

CURRENT CONDITION OF ASSETS:

All Sidewalks in the inventory are conditionally assessed in-house by qualified staff on an annual basis. Individual condition assessments for each asset in this category can be found in Appendix D.

Overall average condition rating for Sidewalks is **87.76** out of **100** which indicates that this category is in **"VERY GOOD"** condition.

Very Good	Good	Fair	Poor	Very Poor
452 Assets	76 Assets	3 Assets	1 Asset	5 Assets
\$6,231,358	\$539,972	\$16,270	\$11,299	\$43,145

RISK:

Overall Average Risk Rating for the Asset Category: 3.64 which indicates a "VERY GOOD" risk rating.

1 - 4	5 - 7	8 - 9	10 - 14	15 - 25
449 Assets	83 Assets	4 Assets	1 Asset	0 Assets
\$5,515,445	\$1,286,099	\$27,546	\$12,954	\$0

\$'S PER YEAR REQUIRED FOR REPLACEMENT PROGRAM:

Annual requirement needed is \$242,558.

Current annual amount dedicated to Sidewalk Replacement is \$144,070.

MAINTENANCE ACTIVITIES:

The following procedures are undertaken on re-occurring basis as part of the Road Maintenance Program:

- Winter Maintenance Snow Clearing, Salting
- Annual Inspections
- · Grinding of Trip Hazards
- Minor Repairs

There is currently \$199,590 in the Annual Operating Budget to offset the costs of these maintenance activities, which should ensure that these activities continue to occur.

LEVELS OF SERVICE:

CONDITION:

1. Sidewalks should be maintained at an overall condition rating of 75-85.

Current Overall Condition Rating is at 87.76.

RISK:

1. All Sidewalks with a Risk Rating of **"10"** or higher should be scheduled for capital work within the next 10 years.

1 of 1 Sidewalks with a Risk rating of "10" or higher are included in the 10-Year Capital Program.

MAINTENANCE:

1. Sidewalks should be maintained according to Minimum Maintenance Standards as per Ontario Regulation 239/02 for Patrols, Winter Maintenance.

100% of Sidewalks are maintained to Ontario Minimum Maintenance Standards

METRICS:

SCOPE:

Total of **121,279 m2** of Sidewalks are owned by the Town of Ingersoll; this represents **6,469 m2** of Sidewalks per square km in the Town.

QUALITY:

Average Condition Index of **87.76** out of **100** for Sidewalk Infrastructure which indicates that Sidewalks are in "VERY GOOD" condition.

GROWTH AND CLIMATE CHANGE:

GROWTH: The Town will experience slow but steady growth over the next 10 years which will result in small increases in pedestrian numbers and demands for Sidewalks. These minor increases will have insignificant impact to the long-term needs for Sidewalk Infrastructure in the Town over this span.

APPENDIX B - DETAILED STATE OF THE INFRASTRUCTURE BY ASSET CATEGORY

ROAD NETWORK – RETAINING WALLS

INVENTORY:

The Town currently owns and maintains 205 sections (3,003 metres) of Retaining Walls. See Appendix D – for the detailed listing of all the assets in this Asset Category.

ESTIMATED ASSET LIFE:

Retaining Walls - 50 Years

INTEGRATED ASSETS:

Roads; Sidewalks; Bridges; Culverts

AVERAGE AGE OF ASSETS IN THE CATEGORY:

Overall: 27.99 Years Old

TOTAL \$'S TO REPLACE THE ENTIRE ASSET CATEGORY:

The total dollars to replace all assets within the Category is: \$1,757,277

CURRENT CONDITION OF ASSETS:

All Retaining Walls in the inventory were conditionally assessed by an Age vs. Estimated Asset Life calculation. Individual condition assessments for each asset in this category can be found in Appendix D.

Overall average condition rating for Retaining Walls is **79.44** out of **100** which indicates that this category is in **"GOOD"** condition.

Very Good	Good	Fair	Poor	Very Poor
132 Assets	46 Assets	4 Assets	0 Assets	22 Assets
\$1,456,626	\$159,618	\$9,204	\$0	\$131,829

RISK:

Overall Average Risk Rating for the Asset Category: 3.27 which indicates a "VERY GOOD" risk rating.

1 - 4	5 - 7	8 - 9	10 - 14	15 - 25
178 Assets	4 Assets	20 Assets	1 Asset	1 Asset
\$1,616,244	\$9,204	\$45,355	\$10,464	\$76,010

\$'S PER YEAR REQUIRED FOR REPLACEMENT PROGRAM:

Annual requirement needed is \$35,146.

Current annual amount dedicated to Retaining Wall Replacement is \$20,401.

MAINTENANCE ACTIVITIES:

The following procedures are undertaken on re-occurring basis as part of the Road Maintenance Program:

- Regular Inspections
- Minor Repairs, when required

There is currently \$36,450 in the Annual Operating Budget to offset the costs of these maintenance activities, which should ensure that these activities continue to occur.

LEVELS OF SERVICE:

CONDITION:

Retaining Walls should be maintained at an overall condition rating of 70 - 80.
 Current Overall Condition Rating is at 79.44.

RISK:

1. All Retaining Walls with a Risk Rating of **"12"** or higher should be scheduled for capital work within the next 10 years.

0 of 1 Retaining Walls with a Risk rating of "12" or higher is scheduled for capital work in the next 10 years.

MAINTENANCE:

Retaining Walls should be inspected and repaired (if needed) on an annual basis.
 100% of Retaining Walls are inspected/repaired each year.

METRICS:

SCOPE:

Total of *3,003 metres* of Retaining Walls are owned by the Town of Ingersoll; this represents *160.21 metres* of Retaining Wall per square km in the Town.

QUALITY:

Average Condition Index of **79.44** out of **100** for Retaining Wall Infrastructure which indicates that Retaining Walls are in "**GOOD**" condition.

GROWTH AND CLIMATE CHANGE:

GROWTH: The Town will experience slow but steady growth over the next 10 years which will result in small increases in population. These minor increases will have insignificant impact to the long-term condition and quality of Retaining Wall Infrastructure in the Town over this span.

APPENDIX B - DETAILED STATE OF THE INFRASTRUCTURE BY ASSET CATEGORY

ROAD NETWORK – GUARDRAILS

INVENTORY:

The Town currently owns and maintains 51 sections (1,344 metres) of Guardrails. See Appendix D – for the detailed listing of all the assets in this Asset Category.

ESTIMATED ASSET LIFE:

Guardrails - 40 Years

INTEGRATED ASSETS:

Roads; Bridges; Culverts

AVERAGE AGE OF ASSETS IN THE CATEGORY:

Overall: 31.22 Years Old

TOTAL \$'S TO REPLACE THE ENTIRE ASSET CATEGORY:

The total dollars to replace all assets within the Category is: \$464,538

CURRENT CONDITION OF ASSETS:

All Guardrails in the inventory were conditionally assessed by an Age vs. Estimated Asset Life calculation. Individual condition assessments for each asset in this category can be found in Appendix D.

Overall average condition rating for Guardrail s is **57.68** out of **100** which indicates that this category is in **"FAIR"** condition.

Very Good	Good	Fair	Poor	Very Poor
14 Assets	16 Assets	3 Assets	0 Assets	18 Assets
\$187,964	\$110,982	\$77,341	\$0	\$88,252

RISK:

Overall Average Risk Rating for the Asset Category: 6.75 which indicates a "GOOD" risk rating.

1 - 4	5 - 7	8 - 9	10 - 14	15 - 25
26 Assets	5 Assets	2 Assets	18 Assets	0 Assets
\$228,697	\$74,347	\$73,242	\$88,252	\$0

\$'S PER YEAR REQUIRED FOR REPLACEMENT PROGRAM:

Annual requirement needed is \$11,613.

Current annual amount dedicated to Guardrails is \$6,912.

MAINTENANCE ACTIVITIES:

The following procedures are undertaken on re-occurring basis as part of the Road Maintenance Program:

- Regular Inspections
- · Minor Repairs, when required

There is currently \$36,450 in the Annual Operating Budget to offset the costs of these maintenance activities, which should ensure that these activities continue to occur.

LEVELS OF SERVICE:

CONDITION:

Guardrails should be maintained at an overall condition rating of 55 – 65.
 Current Overall Condition Rating is at 57.68.

RISK:

1. All Guardrails with a Risk Rating of **"12"** or higher should be scheduled for capital work within the next 10 years.

0 of 1 Guardrails with a Risk rating of "12" or higher are included in the 10-Year Capital Program.

MAINTENANCE:

1. Guardrails should be inspected and repaired (if needed) on an annual basis. **100% of Guardrails are inspected/repaired each year.**

METRICS:

SCOPE:

Total of **1,344 metres** of Guardrails are owned by the Town of Ingersoll; this represents **71.67 metres** of Guardrail per square km in the Town.

QUALITY:

Average Condition Index of **57.68** out of **100** for Guardrail Infrastructure which indicates that Guardrails are in **"FAIR"** condition.

GROWTH AND CLIMATE CHANGE:

GROWTH: The Town will experience slow but steady growth over the next 10 years which will result in small increases in population. These minor increases will have insignificant impact to the long-term condition and quality of Guardrail Infrastructure in the Town over this span.

APPENDIX B - DETAILED STATE OF THE INFRASTRUCTURE BY ASSET CATEGORY

ROAD NETWORK – TRAFFIC SIGNALS

INVENTORY:

The Town currently owns and maintains 7 Traffic Signals (6 with audible beeping signals). See Appendix D – for the detailed listing of all the assets in this Asset Category.

ESTIMATED ASSET LIFE:

Traffic Signals - 25 Years

INTEGRATED ASSETS:

Roads; Sidewalks

AVERAGE AGE OF ASSETS IN THE CATEGORY:

Overall: 12.00 Years Old

TOTAL \$'S TO REPLACE THE ENTIRE ASSET CATEGORY:

The total dollars to replace all assets within the Category is: \$844,459

CURRENT CONDITION OF ASSETS:

All Traffic Signals in the inventory were conditionally assessed by an Age vs. Estimated Asset Life calculation. Individual condition assessments for each asset in this c can be found in Appendix D.

Overall average condition rating for Guardrail s is **88.48** out of **100** which indicates that this category is in **"VERY GOOD"** condition.

Very Good	Good	Fair	Poor	Very Poor
12 Assets	1 Asset	0 Assets	0 Assets	0 Assets
\$736,620	\$107,839	\$0	\$0	\$0

RISK:

Overall Average Risk Rating for the Asset Category: 4.38 which indicates a "VERY GOOD" risk rating.

12 Assets	1 Asset	0 Assets	0 Assets	0 Assets
\$736,620	\$107,839	\$0	\$0	\$0

\$'S PER YEAR REQUIRED FOR REPLACEMENT PROGRAM:

Annual requirement needed is \$33,778.

Current annual amount dedicated to Traffic Signals is \$20,104.

MAINTENANCE ACTIVITIES:

The following procedures are undertaken on re-occurring basis as part of the Road Maintenance Program:

- Regular Inspections
- Minor Repairs/Upgrades

There is currently \$36,450 in the Annual Operating Budget to offset the costs of these maintenance activities, which should ensure that these activities continue to occur.

LEVELS OF SERVICE:

CONDITION:

Traffic Signals should be maintained at an overall condition rating of 75 – 85.
 Current Overall Condition Rating is at 88.48.

RISK:

1. All Traffic Signals with a Risk Rating of **"10"** or higher should be scheduled for capital work within the next 10 years.

There are no Traffic Signals currently with a Risk rating of "10" or higher.

MAINTENANCE:

Traffic Signals should be inspected and repaired (if needed) on an annual basis.
 100% of Traffic Signals are inspected/repaired each year.

METRICS:

SCOPE:

Total of **7 Traffic Signals** are owned by the Town of Ingersoll; this represents **0.37** of Traffic Signals per square km in the Town.

QUALITY:

Average Condition Index of **88.48** out of **100** for Traffic Signal Infrastructure which indicates that Traffic Signals are in "**VERY GOOD**" condition.

GROWTH AND CLIMATE CHANGE:

GROWTH: The Town will experience slow but steady growth over the next 10 years which will result in small increases in population. These minor increases in traffic will have insignificant impact to the long-term condition and quality of Traffic Signal Infrastructure in the Town over this span.

APPENDIX B - DETAILED STATE OF THE INFRASTRUCTURE BY ASSET CATEGORY

ROAD NETWORK – STREETLIGHTS

INVENTORY:

The Town currently owns 2,215 Street Light Fixtures; plus 1,725 Street Light Arms and 607 Street Light Poles. Maintenance is performed by ERTH and billed back to the Town of Ingersoll. See Appendix D – for the detailed listing of all the assets in this Asset Category.

ESTIMATED ASSET LIFE:

Street Light Fixtures - 20 Years
Street Light Arms - 30 Years
Street Light Poles - 50 Years

INTEGRATED ASSETS:

Roads; Sidewalks

AVERAGE AGE OF ASSETS IN THE CATEGORY:

Overall: 27.01 Years Old

Fixtures: 9 Years Old; Arms: 22.5 Years Old; Poles: 30.42 Years Old

TOTAL \$'S TO REPLACE THE ENTIRE ASSET CATEGORY:

The total dollars to replace all assets within the Category is: \$4,662,885

CURRENT CONDITION OF ASSETS:

All Street Lights in the inventory were conditionally assessed by an Age vs. Estimated Asset Life calculation. Individual condition assessments for each asset in this class can be found in Appendix D.

Overall average condition rating for Street Lights is **42.73** out of **100** which indicates that this category is in **"FAIR"** condition.

Very Good	Good	Fair	Poor	Very Poor
6 Assets	14 Assets	18 Assets	16 Assets	28 Assets
\$66,000	\$534,920	\$2,589,775	\$500,160	\$856,320

RISK:

Overall Average Risk Rating for the Asset Category: 6.17 which indicates a "GOOD" risk rating.

1 - 4	5 - 7	8 - 9	10 - 14	15 - 25
30 Assets	24 Assets	28 Assets	0 Assets	0 Assets
\$960,920	\$2,729,935	\$856,320	\$0	\$0

\$'S PER YEAR REQUIRED FOR REPLACEMENT PROGRAM:

Annual requirement needed is 154,363.

Current annual amount dedicated to Street Lights is \$0.

While one-off replacements are occurring through the operating budget, no money is being set aside for the eventual replacement of the full inventory of LED fixtures that have a lifespan of about 20 years.

MAINTENANCE ACTIVITIES:

The following procedures are undertaken on re-occurring basis as part of the Road Maintenance Program:

- Regular Inspections
- Minor Repairs/Upgrades

There is currently \$24,500 in the Annual Operating Budget to offset the costs of these maintenance activities, which should ensure that these activities continue to occur.

LEVELS OF SERVICE:

CONDITION:

Street Lights should be maintained at an overall condition rating of 55 – 65.
 Current Overall Condition Rating is at 42.73.

RISK:

1. All Street Lights with a Risk Rating of "10" or higher should be scheduled for capital work within the next 10 years.

There are No Street Lights currently with a Risk rating of "10" or higher.

MAINTENANCE:

Street Lights should be inspected and repaired (if needed) on an annual basis.
 100% of Street Lights are inspected/repaired each year.

METRICS:

SCOPE:

Total of **2,215** Street Lights are owned by the Town of Ingersoll; this represents **118.15** of Street Lights per square km in the Town.

QUALITY:

Average Condition Index of **42.73** out of **100** for Traffic Signal Infrastructure which indicates that Street Lights are in "FAIR" condition.

GROWTH AND CLIMATE CHANGE:

GROWTH: The Town will experience slow but steady growth over the next 10 years which will result in small increases in population. These minor increases in vehicle and pedestrian traffic will have insignificant impact to the long-term condition and quality of Street Light Infrastructure in the Town over this span.

APPENDIX B - DETAILED STATE OF THE INFRASTRUCTURE BY ASSET CATEGORY

STORM SEWER SERVICES – GRAVITY MAINS

INVENTORY:

The Town currently owns and maintains 70,507 metres of Storm Sewer Gravity Mains in various types of materials within the Storm Sewer Services system; the majority of sections are either Concrete or Polyvinyl Chloride. See Appendix D – for the detailed listing of all the assets in this Asset Category.

ESTIMATED ASSET LIFE:

Concrete - **75 years**Polyvinyl Chloride - **80 years**Clay — **60 years**Corrugated Steel - **50 years**Perforated Pipe - **30 years**Asbestos Cement — **75 Years**

INTEGRATED ASSETS:

Road Surfaces; Road Bases; Culverts

AVERAGE AGE OF ASSETS IN THE CATEGORY:

Overall: 25.74 Years Old

TOTAL \$'S TO REPLACE THE ENTIRE ASSET CATEGORY:

The total dollars to replace all assets within the Category is: \$33,495,399

CURRENT CONDITION OF ASSETS:

The Town has been obtaining conditional assessment data over recent years whenever a gravity main is scoped by 3rd party contract, but this only accounts for a small segment of the total inventory. The remaining sections have been conditionally assessed by an Age vs. Estimated Asset Life calculation. Individual condition assessments for each asset in this category can be found in Appendix D.

Overall average condition rating for Gravity Mains is **90.26** out of **100** which indicates that this category is in **"VERY GOOD"** condition.

Very Good	Good	Fair	Poor	Very Poor
2,378 Assets	426 Assets	53 Assets	11 Assets	48 Assets
\$23,342,946	\$8,015,129	\$1,261,790	\$280,502	\$595,032

RISK:

Overall Average Risk Rating for the Asset Category: 2.04 which indicates a "VERY GOOD" risk rating.

1 - 4	5 - 7	8 - 9	10 - 14	15 - 25
2,826 Assets	76 Assets	10 Assets	4 Assets	0 Assets
\$31,772,155	\$1,317,911	\$181,893	\$223,440	\$0

\$'S PER YEAR REQUIRED FOR REPLACEMENT PROGRAM:

Annual requirement needed is \$418,692.

Current annual amount dedicated to Gravity Mains is \$250,005.

MAINTENANCE ACTIVITIES:

The following procedures are undertaken on re-occurring basis as part of the Road Maintenance Program:

- Regular Inspections
- Minor Repairs
- Flushing & Cleaning

There is currently \$25,000 in the Annual Operating Budget to offset the costs of these maintenance activities, which should ensure that these activities continue to occur.

LEVELS OF SERVICE:

CONDITION:

Gravity Mains should be maintained at an overall condition rating of 85 – 95.
 Current Overall Condition Rating is at 90.26.

RISK:

1. All Gravity Mains with a Risk Rating of **"12"** or higher should be scheduled for capital work within the next 10 years.

There are no Gravity Mains with a Risk rating of "12" or higher.

MAINTENANCE:

1. Gravity Mains should be flushed/cleaned and inspected and on a regular basis.

100% of Gravity Mains are flushed/cleaned and inspected on a regular basis.

METRICS:

SCOPE:

Total of **70,507** *metres* of Gravity Mains are owned by the Town of Ingersoll; this represents **3,761** *metres* of Gravity Mains per square km in the Town.

QUALITY:

Average Condition Index of **90.26** out of **100** for Gravity Main Infrastructure which indicates that Gravity Mains are in "**VERY GOOD**" condition.

10% of the Municipal Stormwater Management System is resilient to a 5-Year Storm. (Most of the system has been designed to withstand a 2-Year Storm)

0% of properties within the Town are resilient to 100-Year Storm.

GROWTH AND CLIMATE CHANGE:

GROWTH: The Town will experience slow but steady growth over the next 10 years which will result in small increases in population. These minor increases will have insignificant impact to the long-term condition and quality of Gravity Main Infrastructure in the Town over this span.

APPENDIX B - DETAILED STATE OF THE INFRASTRUCTURE BY ASSET CATGEORY

STORM SEWER SERVICES – CATCH BASINS

INVENTORY:

The Town currently owns and maintains 1,770 Catch Basins within the Storm Sewer Services system. See Appendix D – for the detailed listing of all the assets in this Asset Category.

ESTIMATED ASSET LIFE:

Catch Basins - 60 years

INTEGRATED ASSETS:

Road Surfaces; Road Bases; Culverts; Gravity Mains

AVERAGE AGE OF ASSETS IN THE CATEGORY:

Overall: 26.38 Years Old

TOTAL \$'S TO REPLACE THE ENTIRE ASSET CATEGORY:

The total dollars to replace all assets within the Category is: \$3,468,348

CURRENT CONDITION OF ASSETS:

All Catch Basins have been conditionally assessed by an Age vs. Estimated Asset Life calculation. Individual condition assessments for each asset in this category can be found in Appendix D.

Overall average condition rating for Gravity Mains is **85.70** out of **100** which indicates that this category is in **"VERY GOOD"** condition.

Very Good	Good	Fair	Poor	Very Poor
1,316 Assets	342 Assets	90 Assets	4 Assets	18 Assets
\$2,603,515	\$676,625	\$160,440	\$5,736	\$22,032

RISK:

Overall Average Risk Rating for the Asset Category: 2.13 which indicates a "VERY GOOD" risk rating.

1 - 4	5 - 7	8 - 9	10 - 14	15 - 25
1,695 Assets	75 Assets	0 Assets	0 Assets	0 Assets
\$3,356,948	\$111,400	\$0	\$0	\$0

\$'S PER YEAR REQUIRED FOR REPLACEMENT PROGRAM:

Annual requirement needed is \$57,806.

Current annual amount dedicated to Storm Water Catch Basins is \$33,158.

MAINTENANCE ACTIVITIES:

The following procedures are undertaken on re-occurring basis as part of the Road Maintenance Program:

- Regular Inspections
- Flushing & Cleaning

There is currently \$61,625 in the Annual Operating Budget to offset the costs of these maintenance activities, which should ensure that these activities continue to occur.

LEVELS OF SERVICE:

CONDITION:

Catch Basins should be maintained at an overall condition rating of 80 – 90.
 Current Overall Condition Rating is at 85.70.

RISK:

1. All Catch Basins with a Risk Rating of "10" or higher should be scheduled for capital work within the next 10 years.

There are No Catch Basins currently with a Risk rating of "10" or higher.

MAINTENANCE:

Catch Basins should be flushed/cleaned and inspected and on a regular basis.
 100% of Gravity Mains are flushed/cleaned and inspected on a regular basis.

METRICS:

SCOPE:

Total of **1,770** of Catch Basins are owned by the Town of Ingersoll; this represents **94.42** Catch Basins per square km in the Town.

QUALITY:

Average Condition Index of **85.70** out of **100** for Catch Basin Infrastructure which indicates that Catch Basins are in "VERY GOOD" condition.

GROWTH AND CLIMATE CHANGE:

GROWTH: The Town will experience slow but steady growth over the next 10 years which will result in small increases in population. These minor increases will have insignificant impact to the long-term condition and quality of Catch Basin Infrastructure in the Town over this span.

APPENDIX B - DETAILED STATE OF THE INFRASTRUCTURE BY ASSET CATEGORY

STORM SEWER SERVICES – PUMPING STATIONS

INVENTORY:

The Town currently owns and maintains (1) Small Pumping Station within the Storm Sewer Services system (corner of Culloden Road and Ingersoll Street). See Appendix D – for the detailed listing of all the assets in this Asset Category.

ESTIMATED ASSET LIFE:

Pumping Station - 50 years

INTEGRATED ASSETS:

Road Surfaces; Road Bases; Culverts

AVERAGE AGE OF ASSETS IN THE CATEGORY:

Overall: 41 Years Old

TOTAL \$'S TO REPLACE THE ENTIRE ASSET CATRGORY:

The total dollars to replace all assets within the Category is: \$77,252

CURRENT CONDITION OF ASSETS:

The Pumping Station has been conditionally assessed by an Age vs. Estimated Asset Life calculation.

Overall average condition rating for Pumping Stations is **59.96** out of **100** which indicates that this category is in **"FAIR"** condition.

Very Good	Good	Fair	Poor	Very Poor
0 Assets	0 Assets	1 Asset	0 Assets	0 Assets
\$0	\$0	\$77,252	\$0	\$0

RISK:

Overall Average Risk Rating for the Asset Category: 8.85 which indicates a "FAIR" risk rating.

\$'S PER YEAR REQUIRED FOR REPLACEMENT PROGRAM:

Annual requirement needed is \$1,545.

Current annual amount dedicated to Pumping Stations is \$920.

MAINTENANCE ACTIVITIES:

The following procedures are undertaken on re-occurring basis as part of the Road Maintenance Program:

- Regular Inspections and Testing
- Misc. Repairs

There is currently \$1,000 in the Annual Operating Budget to offset the costs of these maintenance activities, which should ensure that these activities continue to occur.

LEVELS OF SERVICE:

CONDITION:

1. Pumping stations should be maintained at an overall condition rating of 55 – 65. *Current Overall Condition Rating is at 59.96.*

RISK:

1. Pumping Stations with a Risk Rating of **"10"** or higher should be scheduled for capital work within the next 10 years.

There are No Pumping Stations currently with a Risk rating of "10" or higher.

MAINTENANCE:

Pumping Stations should be inspected and tested on a regular basis.
 100% of Pumping Stations are inspected and tested on a regular basis.

METRICS:

SCOPE:

One Pumping Station is owned and maintained by the Town of Ingersoll; this represents *0.053* Pumping Stations per square km in the Town.

QUALITY:

Average Condition Index of **59.96** out of **100** for Pumping Station Infrastructure which indicates that Pumping Stations are in **"FAIR"** condition.

GROWTH AND CLIMATE CHANGE:

GROWTH: The Town will experience slow but steady growth over the next 10 years which will result in small increases in population. These minor increases will have insignificant impact to the long-term condition and quality of Pumping Station Infrastructure in the Town over this span.

APPENDIX B - DETAILED STATE OF THE INFRASTRUCTURE BY ASSET CATEGORY

STORM SEWER SERVICES – STORM WATER MANAGEMENT FACILITIES

INVENTORY:

The Town currently owns and maintains 6 Storm Water Management Facilities. See Appendix D – for the detailed listing of all the assets in this Asset Category.

ESTIMATED ASSET LIFE:

Storm Management Facilities - 50 years

INTEGRATED ASSETS:

Road Surfaces; Road Bases; Culverts; Gravity Mains; Catch Basins

AVERAGE AGE OF ASSETS IN THE CATEGORY:

Overall: 23.83 Years Old

TOTAL \$'S TO REPLACE THE ENTIRE ASSET CATEGORY:

The total dollars to replace all assets within the Category is: \$592,881

CURRENT CONDITION OF ASSETS:

The Storm Water Management Facilities have been conditionally assessed by an Age vs. Estimated Asset Life calculation.

Overall average condition rating for Storm Water Management Facilities is **85.08** out of **100** which indicates that this category is in "**VERY GOOD**" condition.

Very Good	Good	Fair	Poor	Very Poor
4 Assets	1 Asset	1 Asset	0 Assets	0 Assets
\$334,424	\$58,927	\$199,530	\$0	\$0

RISK:

Overall Average Risk Rating for the Asset Category: 4.22 which indicates a "VERY GOOD" risk rating.

1 - 4	5 - 7	8 - 9	10 - 14	15 - 25
4 Assets	1 Asset	1 Asset	0 Assets	0 Assets
\$334,424	\$58,927	\$199,530	\$0	\$0

\$'S PER YEAR REQUIRED FOR REPLACEMENT PROGRAM:

Annual requirement needed is \$11,858.

Current annual amount dedicated to SWMF's is \$7,057.

MAINTENANCE ACTIVITIES:

The following procedures are undertaken on re-occurring basis as part of the Road Maintenance Program:

- Regular Inspections
- Lawn Mowing/Brush Cutting
- Weed Control
- Misc. Repairs

There is currently \$5,000 in the Annual Operating Budget to offset the costs of these maintenance activities, which should ensure that these activities continue to occur.

LEVELS OF SERVICE:

CONDITION:

1. SWMF's should be maintained at an overall condition rating of 75 - 85.

Current Overall Condition Rating is at 85.08.

RISK:

1. SWMF's with a Risk Rating of "10" or higher should be scheduled for capital work within the next 10 years.

There are no SWMF's currently with a Risk rating of "10" or higher.

MAINTENANCE:

1. SWMF's should be inspected on a regular basis.

100% of SWMF's are inspected on a regular basis.

METRICS:

SCOPE:

6 Storm Water Management Facilities are owned and maintained by the Town of Ingersoll; this represents **0.62** Storm Water Management Facilities per square km in the Town.

QUALITY:

Average Condition Index of **85.08** out of **100** for Storm Water Management Facility Infrastructure which indicates that SWMF's are in "**VERY GOOD**" condition.

GROWTH AND CLIMATE CHANGE:

GROWTH: The Town will experience slow but steady growth over the next 10 years which will result in small increases in population. These minor increases will have insignificant impact to the long-term condition and quality of Storm Water Management Facility Infrastructure in the Town over this span.

APPENDIX B - DETAILED STATE OF THE INFRASTRUCTURE BY ASSET CATEGORY

STORM SEWER SERVICES – OTHER COMPONENTS

INVENTORY:

The Town currently owns and maintains 930 other components within the Storm Sewer Services system; 20 Erosion Control assets, 21 Headwalls, and 889 Storm Maintenance Holes. See Appendix D – for the detailed listing of all the assets in this Asset Category.

ESTIMATED ASSET LIFE:

Erosion Control Assets - *50 years* Headwalls - *80 Years* Storm Maintenance Holes – *60 Years*

INTEGRATED ASSETS:

Road Surfaces; Road Bases; Culverts; Gravity Mains; Catch Basins

AVERAGE AGE OF ASSETS IN THE CATEGORY:

Overall: 25.05 Years Old

TOTAL S'S TO REPLACE THE ENTIRE ASSET CATEGORY:

The total dollars to replace all assets within the Category is: \$5,909,100.

CURRENT CONDITION OF ASSETS:

The Storm Sewer Services Other Components have been conditionally assessed by an Age vs. Estimated Asset Life calculation.

Overall average condition rating for Other Components is **86.74** out of **100** which indicates that this category is in "VERY GOOD" condition.

Erosion Control:

Very Good	Good	Fair	Poor	Very Poor
19 Assets	1 Asset	0 Assets	0 Assets	0 Assets
\$329,537	\$36,926	\$0	\$0	\$0

Headwalls:

Very Good	Good	Fair	Poor	Very Poor
21 Assets	0 Assets	0 Assets	0 Assets	0 Assets
\$153,524	\$0	\$0	\$0	\$0

Storm Maintenance Holes:

\$5,092,282	\$228,952	\$47,062	\$20,817	\$0

\$'S PER YEAR REQUIRED FOR REPLACEMENT PROGRAM:

Annual requirement needed is \$73,864.

Current annual amount dedicated to Storm Sewer Other Components is \$43,453.

MAINTENANCE ACTIVITIES:

The following procedures are undertaken on re-occurring basis:

- Regular Inspections
- Cleaning/Flushing

There is currently \$61,625 in the Annual Operating Budget to offset the costs of these maintenance activities, which should ensure that these activities continue to occur.

LEVELS OF SERVICE:

CONDITION:

1. Storm Sewer Other Components should be maintained at a condition rating of 80 – 90. *Current Overall Condition Rating is at 86.74.*

RISK:

1. Storm Sewer Other Components with a Risk Rating of "10" or higher should be scheduled for capital work within the next 10 years.

0 of 6 Other Components with a Risk rating of "10" or higher are included in the 10-Year Capital Program.

MAINTENANCE:

2. Other Components should be inspected on a regular basis.

100% of Other Components are inspected on a regular basis.

METRICS:

SCOPE:

930 Other Storm Sewer Components are owned and maintained by the Town of Ingersoll; this represents **49.61** Components per square km in the Town.

QUALITY:

Average Condition Index of **86.74** out of **100** for Storm Water Management Facility Infrastructure which indicates that Other Components are in "**VERY GOOD**" condition.

GROWTH AND CLIMATE CHANGE:

GROWTH: The Town will experience slow but steady growth over the next 10 years which will result in small increases in population. These minor increases will have insignificant impact to the long-term condition and quality of Storm Sewer Infrastructure in the Town over this span.

APPENDIX B - DETAILED STATE OF THE INFRASTRUCTURE BY ASSET CATEGORY

FACILITIES

INVENTORY:

The Town currently owns 34 Facilities ranging from large complexes such as the Victoria Park Community Complex and the Fusion Centre to small structures such as Park Equipment Storage Buildings and Park Washrooms. See Appendix D – for the detailed listing of all the assets in this Asset Category.

ESTIMATED ASSET LIFE:

50 Years – While most facility structures will last well beyond the 50 year expected life, this number is utilized because it represents the estimated 2% yearly funding requirements that is frequently used for building infrastructure by asset management professionals.

INTEGRATED ASSETS:

Parking Lots; Sidewalks

AVERAGE AGE OF ASSETS IN THE CATEGORY:

35.21 Years Old

TOTAL \$'S TO REPLACE THE ENTIRE ASSET CATEGORY:

The total dollars to replace all assets within the Category is: \$75,425,000

Note: Building structures are rarely fully-replaced. This value is mainly utilized to calculate a reasonable yearly funding level for each building.

CURRENT CONDITION OF ASSETS:

Building assessments have been conducted on most of the Town's major building structures over the last several years and these were utilized to estimate Condition Ratings on these structures. Remaining structures have been conditionally rated based on a review of age of the building and significant renovations or component replacements that have occurred on the building.

Overall average condition rating for the Facilities is **64.43** out of **100** which indicates that this category is in **"GOOD"** condition.

Very Good	Good	Fair	Poor	Very Poor
7 Assets	11 Assets	11 Assets	2 Assets	1 Asset
\$550,000	\$32,350,000	\$17,425,000	\$100,000	\$25,000,000

RISK:

Overall Average Risk Rating for the Asset Category: 4.93 which indicates a "VERY GOOD" risk rating.

1 - 4	5 - 7	8 - 9	10 - 14	15 - 25
15 Assets	15 Assets	1 Asset	0 Assets	1 Asset
\$1,975,000	\$38,450,000	\$10,000,000	\$0	\$25,000,000

\$'S PER YEAR REQUIRED FOR REPLACEMENT PROGRAM:

Annual requirement needed is \$1,508,500.

Current annual amount dedicated to Facilities is \$690,000.

MAINTENANCE ACTIVITIES:

The following procedures are undertaken on re-occurring basis as part of the Facilities Maintenance Program:

- Regular Safety Inspections
- Regular Cleaning and Maintenance
- Small Repairs/Renovation
- Painting (when required)

There is currently \$164,600 in the Annual Operating Budget to offset the costs of these maintenance activities, which should ensure that these activities continue to occur.

LEVELS OF SERVICE:

CONDITION:

1. Facilities should be maintained at an overall condition rating of 55 – 65. **Current Overall Condition Rating is at 64.43.**

RISK:

1. All Facilities will a Risk Rating of **"12"** or higher should be scheduled for major capital work within the next 10 years.

1 of 1 Facilities with a Risk rating of "12" or higher is included in the 10-Year Capital Program.

MAINTENANCE:

1. All Facilities should be inspected for Health & Safety issues and Maintenance issues on a regular basis.

All Facilities are regularly inspected and repairs completed (when needed).

METRICS:

SCOPE:

1. Total of **34** Facilities owned by the Town of Ingersoll; this represents **1.81** buildings per square km in the Town.

QUALITY:

1. Average Condition Index of 64.43 out of 100 for Facilities Infrastructure.

GROWTH AND CLIMATE CHANGE:

GROWTH: The Town will experience slow but steady growth over the next 10 years which will result in small increases in user numbers for those buildings that are utilized by the general public. These minor increases will have insignificant impact to the long-term condition and quality of Facilities in the Town over this span.

APPENDIX B - DETAILED STATE OF THE INFRASTRUCTURE BY ASSET CATEGORY

LAND IMPROVEMENTS

INVENTORY:

The Town currently owns and maintains 128 separate Land Improvements. Examples of Land Improvement Infrastructure are Sports Fields, Parking Lots, Pathways, and Playground Equipment. See Appendix D – for the detailed listing of all the assets in this Asset Category.

ESTIMATED ASSET LIFE:

The estimated Lifespan of Land Improvements can vary greatly by type of infrastructure.

INTEGRATED ASSETS:

Parking Lots; Sidewalks

AVERAGE AGE OF ASSETS IN THE CATEGORY:

19.67 Years Old

TOTAL \$'S TO REPLACE THE ENTIRE ASSET CATEGORY:

The total dollars to replace all assets within the Category is: \$7,367,701

CURRENT CONDITION OF ASSETS:

While some Land Improvement Infrastructure has been conditionally assessed by qualified staff, the majority of assets have been conditionally assessed by an Age vs. Estimated Asset Life calculation.

Overall average condition rating for the Land Improvements is **65.95** out of **100** which indicates that this category is in **"GOOD"** condition.

Very Good	Good	Fair	Poor	Very Poor
41 Assets	27 Assets	17 Assets	5 Assets	38 Assets
\$2,081,535	\$2,018,041	\$805,244	\$167,469	\$2,300,412

RISK:

Overall Average Risk Rating for the Asset Category: 6.44 which indicates a "GOOD" risk rating.

1 - 4	5 - 7	8 - 9	10 - 14	15 - 25
65 Assets	25 Assets	11 Assets	27 Assets	0 Assets
\$3,803,962	\$1,223,281	\$494,282	\$1,851,176	\$0

\$'S PER YEAR REQUIRED FOR REPLACEMENT PROGRAM:

Annual requirement needed is \$350,545

Current annual amount dedicated to Facilities is \$29,000

MAINTENANCE ACTIVITIES:

The following procedures are undertaken on re-occurring basis as part of the Land Improvements Maintenance Program:

- Regular Safety Inspections
- Regular Cleaning and Maintenance
- Small Repairs/Renovation
- Painting (when required)

There is currently \$65,000 in the Annual Operating Budget to offset the costs of these maintenance activities, which should ensure that these activities continue to occur.

LEVELS OF SERVICE:

CONDITION:

Land Improvements should be maintained at an overall condition rating of 60 – 70.
 Current Overall Condition Rating is at 65.95.

RISK:

1. All Land Improvements will a Risk Rating of "12" or higher should be scheduled for major capital work within the next 10 years.

8 of 20 Land Improvements with a Risk rating of "12" or higher are included in the 10-Year Capital Program.

MAINTENANCE:

1. All Land Improvements should be inspected for Health & Safety issues and Maintenance issues on a regular basis.

All Land Improvements are regularly inspected and repairs completed (when needed).

METRICS:

SCOPE:

1. Total of **138** Land Improvements owned by the Town of Ingersoll; this represents **7.36** Land Improvements per square km in the Town.

QUALITY:

1. Average Condition Index of 65.95 out of 100 for Land Improvement Infrastructure.

GROWTH AND CLIMATE CHANGE:

GROWTH: The Town will experience slow but steady growth over the next 10 years which will result in small increases in user numbers for those Land Improvements that are utilized by the general public. These minor increases will have insignificant impact to the long-term condition and quality of Land Improvements in the Town over this span.

CLIMATE CHANGE: While Climate Change is causing a slight increase in the number and intensity of significant weather events, the Town does not anticipate any major financial impacts to this Asset Category over the next 10 years.

APPENDIX B - DETAILED STATE OF THE INFRASTRUCTURE BY ASSET CATEGORY

MACHINERY & EQUIPMENT

INVENTORY:

The Town currently owns and maintains 101 separate pieces of Machinery & Equipment. See Appendix D – for the detailed listing of all the assets in this Asset Category.

ESTIMATED ASSET LIFE:

The estimated Lifespan of Machinery & Equipment can vary greatly by type of equipment.

INTEGRATED ASSETS:

Buildings; Land Improvements

AVERAGE AGE OF ASSETS IN THE CATEGORY:

11.02 Years Old

TOTAL \$'S TO REPLACE THE ENTIRE ASSET CATEGORY:

The total dollars to replace all assets within the Category is: \$3,943,587

CURRENT CONDITION OF ASSETS:

Machinery & Equipment assets have been conditionally assessed by a simple Age vs. Estimated Asset Life calculation.

Overall average condition rating for the Machinery & Equipment is **47.78** out of **100** which indicates that this category is in **"FAIR"** condition.

Very Good	Good	Fair	Poor	Very Poor
15 Assets	14 Assets	20 Assets	12 Assets	40 Assets
\$651,173	\$423,631	\$1,063,164	\$423,442	\$1,382,177

RISK:

Overall Average Risk Rating for the Asset Category: 5.37 which indicates a "GOOD" risk rating.

1 - 4	5-7	8 - 9	10 - 14	15 - 25
45 Assets	40 Assets	1 Asset	15 Assets	0 Assets
\$1,250,703	\$1,509,771	\$32,797	\$1,150,316	\$0

\$'S PER YEAR REQUIRED FOR REPLACEMENT PROGRAM:

Annual requirement needed is \$356,425

Current annual amount dedicated to Machinery & Equipment is \$298,000

MAINTENANCE ACTIVITIES:

The following procedures are undertaken on re-occurring basis as part of the Machinery & Equipment Maintenance Program:

- Regular Safety Inspections
- Regular Cleaning and Maintenance
- Small Repairs

There is currently \$69,600 in the Annual Operating Budget to offset the costs of these maintenance activities, which should ensure that these activities continue to occur.

LEVELS OF SERVICE:

CONDITION:

Machinery & Equipment should be maintained at an overall condition rating of 50 – 60.
 Current Overall Condition Rating is at 47.78.

RISK:

1. All Machinery & Equipment with a Risk Rating of "12" or higher should be scheduled for major capital work within the next 10 years.

5 of 9 Pieces of Machinery & Equipment with a Risk rating of "12" or higher are included in the 10-Year Capital Program.

MAINTENANCE:

1. All Machinery & Equipment should be inspected for Health & Safety issues and Maintenance issues on a regular basis.

All Machinery & Equipment is regularly inspected and repairs completed (when needed).

METRICS:

SCOPE:

1. Total of **101** Pieces of Machinery & Equipment owned by the Town of Ingersoll; this represents **5.39** Pieces of Machinery & Equipment per square km in the Town.

QUALITY:

1. Average Condition Index of 47.78 out of 100 for Machinery & Equipment Infrastructure.

GROWTH AND CLIMATE CHANGE:

GROWTH: The Town will experience slow but steady growth over the next 10 years. These minor increases will have insignificant impact to the long-term condition and quality of Machinery & Equipment in the Town over this span.

CLIMATE CHANGE: While Climate Change is causing a slight increase in the number and intensity of significant weather events, the Town does not anticipate any major financial impacts to this Asset Category over the next 10 years.

APPENDIX B - DETAILED STATE OF THE INFRASTRUCTURE BY ASSET CATEGORY

VEHICLES

INVENTORY:

The Town currently owns and maintains 30 Vehicles. See Appendix D – for the detailed listing of all the assets in this Asset Category.

ESTIMATED ASSET LIFE:

The estimated Lifespan of Vehicles varies between types of vehicles.

INTEGRATED ASSETS:

Facilities

AVERAGE AGE OF ASSETS IN THE CATEGORY:

10.13 Years Old

TOTAL \$'S TO REPLACE THE ENTIRE ASSET CATEGORY:

The total dollars to replace all assets within the Category is: \$5,240,000

CURRENT CONDITION OF ASSETS:

Vehicles have been conditionally assessed by a simple Age vs. Estimated Asset Life calculation.

Overall average condition rating for the Vehicles is **58.55** out of **100** which indicates that this category is in **"FAIR"** condition.

Very Good	Good	Fair	Poor	Very Poor
12 Assets	4 Assets	2 Assets	3 Assets	8 Assets
\$1,905,000	\$1,110,000	\$90,000	\$1,555,000	\$580,000

RISK:

Overall Average Risk Rating for the Asset Category: 7.05 which indicates a "GOOD" risk rating.

1 - 4	5 - 7	8 - 9	10 - 14	15 - 25
11 Assets	10 Assets	5 Assets	1 Asset	2 Assets
\$540,000	\$1,755,000	\$445,000	\$750,000	\$1,750,000

\$'S PER YEAR REQUIRED FOR REPLACEMENT PROGRAM:

Annual requirement needed is \$356,500

Current annual amount dedicated to Vehicles is \$280,000

MAINTENANCE ACTIVITIES:

The following procedures are undertaken on re-occurring basis as part of the Vehicles Maintenance Program:

- Regular Safety Inspections
- Regular Cleaning and Maintenance
- Small Repairs

There is currently \$69,600 in the Annual Operating Budget to offset the costs of these maintenance activities, which should ensure that these activities continue to occur.

LEVELS OF SERVICE:

CONDITION:

Vehicles should be maintained at an overall condition rating of 50 – 60.
 Current Overall Condition Rating is at 58.55.

RISK:

1. All Vehicles with a Risk Rating of "12" or higher should be scheduled for replacement within the next 10 years.

3 of 3 Vehicles with a Risk rating of "12" or higher are included in the 10-Year Capital Program.

MAINTENANCE:

1. All Vehicles should be inspected for Health & Safety issues and Maintenance issues on a regular basis.

All Vehicles is regularly inspected and repairs completed (when needed).

METRICS:

SCOPE:

1. Total of **30** Vehicles owned by the Town of Ingersoll; this represents **1.6** Vehicles per square km in the Town.

QUALITY:

1. Average Condition Index of 58.55 out of 100 for Vehicle Infrastructure.

GROWTH AND CLIMATE CHANGE:

GROWTH: The Town will experience slow but steady growth over the next 10 years. These minor increases will have insignificant impact to the long-term condition and quality of Vehicles in the Town over this span.

CLIMATE CHANGE: While Climate Change is causing a slight increase in the number and intensity of significant weather events, the Town does not anticipate any major financial impacts to this Asset Category over the next 10 years.
